

Every weekend we crank up our “oldies”, the 80’s, and let it rip!....

Weekends are suppose to be fun and Radio XL5 helps you have fun with double shots of 80’s hits!

It is so much fun that we ask you to “Please Listen Responsibly”! We don’t want you to hurt yourself!

We have a huge; we mean huge, library of national and regional 80’s hits that we love to play. So why not take us along with you? We are available on your PC and your smart phone. In fact, if you load this link into your smart phone, you will get our basic smart phone app for Androids, iPhones, and Blackberry.

<http://mobile.shoutcaststreaming.us/radioxl5/>

So take us along. If your car has BlueTooth then linking to your car’s stereo system is easy. If not, all you need is a tiny FM modulator to transmit Radio XL5 on your Smart Phone to an unused spot on your FM dial. Here is a typical device that plugs into your cigarette lighter and communicates with your cell phone over Bluetooth. Your phone’s audio, phone calls, MP3 files and Radio XL5 will all be heard on your car stereo in crisp and clear stereo! This unit is made by mBeat. There are many to choose from and in various price ranges. Checkout mBeat’s website for this device at:
